## Synthetic Structures: A Guide to Instruments and Applications:

3 of 3 review helpful a practical guide By K J Broekema This is a good book about how credit risk derivatives are handled in the daily practice of a big international bank Although the author clearly knows her math the book contains hardly any formula Since I am a model builder and most clients of our treasury consultancy firm are medium size companies there initially was a misfit However this book is a very good anti Fully revised and updated Here is the only comprehensive source that explains the various instruments in the market their economic value how to document trades and more This new edition includes enhanced treatment of U S and worldwide regulatory issues and new product structures If you want to know more about credit derivatives and these days an increasing number of people do then you should read this book Merton H Miller winner Nobel Prize If you want to know more about credit derivatives and these days an increasing number of people do then you should read this book Merton H Miller winner Nobel Prize in Economics 1990 Robert R McCormick Distinguished Service Professor Emeritus University of Chicago
