economics and business research Advances in Credit Risk Modelling and Corporate Bankruptcy Prediction
(Quantitative Methods for Applied Economics and Business Research):

The field of credit risk and corporate bankruptcy prediction has gained considerable momentum following the collapse
of many large corporations around the world and more recently through the sub prime scandal in the United States
This book provides a thorough compendium of the different modelling approaches available in the field including
several new techniques that extend the horizons of future research and practice Topics covered include probit models
in particul
